- 1 Turn Track Marker
- 6 Dice
- 1 Black Cloth Bag
- 1 Rulebook

Steam-belching iron horses roar West across the U.S. in the 1830's. Relive the era of pioneering U.S. railroad companies that built the track and transformed America's economy. The cut-throat action is centered on the industrial powerhouses of the growing nation: Pittsburgh, Cincinnati, Chicago, and beyond.

Age of Steam features a painted map, artwork from the renowned game artist Paul E. Niemeyer, 120 detailed plastic locomotives, a 16-page full-color rulebook, and loads of track tiles. The whistles blow and the trains rumble past, heralding the return of the Age of Steam.

Age of Steam is listed #12 on the BoardGameGeek website's list of the best games available in the world. It is generally considered the best Railroad game ever made and is excellent for students of history.

This new edition supports 36 expansions that have been created over the past six years for this game – testimony to its enduring popularity!

"A truly great game, it's a deep, immersive game about building train routes across mid-America. It is Martin Wallace's best game, and one that should be in any serious gamer's collection. Age of Steam has entered my Top Ten Games and, with expansion maps continually coming out, it will probably stay there for quite some time.
